Snowdon Towers

An Autodesk Revit sample project

Brownsville, PA

Previously on this site:

Project Location:

GIS Coordinate System: PA81-1P
46.822717N, -79.884647W

How to use this project:

This is the: Snowdon Towers Sample Architectural.rvt model

This project is distributed across several Revit models in keeping with industry standard best practices. If you wish to view the entire project, you can open each model individually or you can link them all together. You will find all models in the same folder.

The models included are:
Snowdon Towers Sample Architectural.rvt
Snowdon Towers Sample Site.rvt
Snowdon Towers Sample Foundation.rvt
Snowdon Towers Sample Structural.rvt
Snowdon Towers Sample Planning.rvt
Snowdon Towers Sample MEP.rvt
Snowdon Towers Sample Electrical.rvt
Brownsville.rvt (Point Cloud)

All models use the same coordinate system and are stored in the same folder by default. When templates have been saved and applied to these within the models to help ensure that geometry displays correctly both in your host model and any linked models.

To attach a link, do the following:

1. Open a floor plan view, such as: Floor Plan L1.
2. Click the Insert tab of the ribbon.
3. Click the Link Revit or Point Cloud button. (Figure 1)
4. Select the file that you wish to link.
5. Ensure that Positioning is set for Auto - Internal Origin to Internal Origin and then click Open. (Figure 2)

(Alternatively, you can choose: Auto - By Shared Coordinates. This is optional as all files use the same internal origin.)
